Female—blood transfusion due to primary postpartum haemorrhage indicator, yes/no/not stated/inadequately described code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Blood transfusion for primary postpartum haemorrhage indicator
METEOR identifier:	733476
Registration status:	Health! , Superseded 17/12/2021
Definition:	An indicator of whether a female received a blood transfusion as a result of a primary postpartum haemorrhage , as represented by a code.
Data Element Concept:	Female—blood transfusion due to primary postpartum haemorrhage indicator
Value Domain:	Yes/no/not stated/inadequately described code N

Value domain attributes

Representational attributes

Representation class:	Code
Data type:	Number
Format:	N
Maximum character length:	1

	Value	Meaning
Permissible values:	1	Yes
	2	No
Supplementary values:	9	Not stated/inadequately described

Collection and usage attributes

Guide for use:	CODE 9 Not stated/inadequately described This code is not for use in primary data collections.
-----------------------	---

Data element attributes

Collection and usage attributes

Guide for use: Blood transfusion refers to the administration of blood (including autologous blood via a cell salvage procedure), blood products or blood substitutes, but excludes volume expanders.

CODE 1 Yes

To be reported if a female received a blood transfusion.

CODE 2 No

To be reported if a female did not receive a blood transfusion (including cases where one is offered but refused).

CODE 9 Not stated/inadequately described

To be recorded by data entry personnel (state/territory health authority) if the data field is left blank or is inadequately completed in the perinatal data collection form or extract. Clinicians should not record Code 9.

Source and reference attributes

Submitting organisation: National Perinatal Data Development Committee
