Indigenous-specific primary health care: PI12a- Number of Indigenous regular clients classified as overweight or obese, December 2020

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Output measure
Short name:	PI12a-Number of Indigenous regular clients classified as overweight or obese, December 2020
METEOR identifier:	739384
Registration status:	Indigenous , Standard 14/07/2021
Description:	Number of Indigenous regular clients aged 25 and over who had their body mass index (BMI) classified as overweight or obese within the previous 24 months.
Rationale:	Obesity is closely associated with risk factors for the main causes of morbidity and mortality among Aboriginal and Torres Strait Islander people.
Indicator set:	Indigenous-specific primary health care national key performance indicators December 2020 Indigenous , Standard 14/07/2021

Collection and usage attributes

Population group age from:	25 years and over				
Computation description:	<p>Count of Indigenous regular clients aged 25 and over who had their BMI classified as overweight or obese within the previous 24 months.</p> <p>Presented as a number.</p> <p>BMI: A measure of an adult's weight (body mass) relative to height, used to assess the extent of weight deficit or excess where height and weight have been measured. Body mass index is the weight in kilograms divided by the square of the height in metres (WHO 2017).</p> <p>Calculated separately for overweight and obese classifications.</p> <p>If the client had their BMI recorded more than once within the previous 24 months, only the most recently recorded result is included in this calculation.</p> <p>Only include those client's whose BMI was classified using a height measurement taken since the client turned 25 and a weight measurement taken within the previous 24 months.</p>				
Computation:	Numerator only				
Numerator:	<p>Calculation A: Number of Presented as a number aged 25 and over who had their BMI classified as overweight within the previous 24 months.</p> <p>Calculation B: Number of Presented as a number aged 25 and over who had their BMI classified as obese within the previous 24 months.</p>
