Local Hospital Networks/Public hospital establishments NMDS 2022–23

Identifying and definitional attributes

Metadata item type:	Data Set Specification
METEOR identifier:	742044
Registration status:	HealthI , Standard 17/12/2021
DSS type:	National Minimum Data Set (NMDS)
Scope:	<p>The scope of the Local Hospital Networks/Public hospital establishments national minimum data set (LHN/PHE NMDS) includes three levels of hierarchical reporting:</p> <ul style="list-style-type: none">• The Public hospital establishments (PHE) component includes establishment-level data for public acute and psychiatric hospitals, and alcohol and drug treatment centres. Hospitals specialising in dental, ophthalmic aids and other specialised acute medical or surgical care are also included in PHE. Hospitals operated by the Australian Defence Force, correctional authorities and Australia's external territories are not included.• The Local Hospital Networks (LHN) excludes data for hospital establishments which are already reported through the Public hospital establishments component. Local Hospital Networks are defined as those entities recognised as such by the relevant state or territory health authority.• At the jurisdictional level, all public hospital services that are managed by a state or territory health authority and are included in the <i>General List of In-scope Public Hospital Services</i> (IHPA 2019), which has been developed under the National Health Reform Agreement (2011) (NHRA) (COAG 2011) and excluding data which are already reported in the PHE or LHN levels.

Collection and usage attributes

Statistical unit:	PHE, LHN or health authority (depending on reporting level)
--------------------------	---

Guide for use:

The following are principles of the collection. States and territories should consider these principles when providing data.

1. Data should be reported by states and territories at the level relevant to service management and/or provision.
2. The LHN/PHE NMDS should capture and differentiate between in-scope and out-of-scope of the NHRA.
3. The LHN/PHE NMDS must specify where financial data elements are reporting actual data and where they are reporting estimated data.
4. Where possible, the LHN/PHE NMDS should align with the Government health expenditure NMDS (GHE NMDS), so it is able to function as a subset of the GHE NMDS if required.
5. Reporting on expenditure relating to contracted care requires less detail than other expenditure and activity.
6. Where possible, the changes to the PHE component of the NMDS should maintain the ability to report time series data from previous years.

Similar data for private hospitals and free-standing day hospital facilities for PHE was collected by the Australian Bureau of Statistics in the Private Health Establishments Collection, up to and including 2016-17, at which point collection of this data ceased.

Recurrent expenditure and related revenue data reported to the LHN/PHE NMDS should reconcile with published financial statements.

Actual recurrent expenditure and related revenue data are expected to be reported at the level at which they appear in the general ledger, regardless of whether all components are a 'public hospital service' under the NHRA. Expenditure and revenue data are not expected to be apportioned to a lower level.

Expenditure data are reported in two ways:

- as it would appear in the general ledger line items ([Establishment—recurrent non-salary expenditure, public hospital expenditure categories code N\[N\]](#) and [Establishment—staffing categories, health code N\[N\]](#))
- by NHRA product streams [Establishment—total recurrent expenditure, National Health Reform Agreement 2011 product streams code N\[N\]](#). These are estimated data.

The total recurrent expenditure by product stream should equal the total recurrent expenditure by general ledger line item.

For the purposes of the LHN/PHE NMDS, funding from the Australian Government, state and territory health authorities and other state and territory government departments is considered to be revenue and should be reported as such.

Collection methods:

Some data for this NMDS are sourced from the state or territory health authority general ledger. Some other data are maintained at the LHN or hospital and are forwarded to the relevant state or territory health authority for inclusion.

National reporting arrangements

State and territory health authorities provide the data to the Australian Institute of Health and Welfare for national collation, on an annual basis.

Periods for which data are collected and nationally collated

Financial years ending 30 June each year.

Implementation start date: 01/07/2022

Implementation end date: 30/06/2023

Comments:*Relationship between the three components*

The three levels of the hierarchy work together to collect the same types of recurrent expenditure and related revenue data items, but at different levels of the system. The reporting levels are mutually exclusive, so there should be no overlap in the reporting or expenditure and revenue data across the levels.

<i>Hierarchical level</i>	<i>Data collected through</i>
Public hospital establishments	PHE component
Local Hospital Network	LHN component
State or territory health authority	State or territory component

It is expected that recurrent expenditure and related revenue data will be reported at the level at which they occur.

For services 'managed by a state or territory health authority', only those services considered to be 'public hospital services' under the NHRA are in scope. For the public hospitals and LHNs, all activity, expenditure and related revenue in the General Ledger for that organisation would be in scope of this NMDS, regardless of whether all components are a 'public hospital service' under the NHRA.

For information on public hospital services in-scope or out-of-scope, refer to the National Efficient Price Determination (IHPA 2021a) and the National Efficient Cost Determination (IHPA 2021b).

In addition to the shared expenditure and revenue data items, the PHE component includes items such as establishment location, establishment type and specialised service indicators that do not appear in the other components.

Scope links with other NMDSs

The LHN/PHE NMDS shares scope with other hospital NMDSs and NBEDSs as well as other establishment and expenditure collections:

- Admitted patient care NMDS
- Alcohol and other drug treatment services NMDS
- Government health expenditure NMDS
- Mental health establishments NMDS
- Non-admitted patient care hospital aggregate NBEDS
- Non-admitted patient emergency department care NMDS.

-	Address—secondary complex name, text X[X(49)]	Conditional	1
	Conditional obligation: Conditional on this component being part of the address of the Public hospital establishment.		

Seq No.	Metadata item	Obligation	Max occurs
-	Address—sub-dwelling unit number, identifier X[X(6)]	Conditional	1
	Conditional obligation: Conditional on this component being part of the address of the Public hospital establishment.		
-	Address—suburb/town/locality name, text X[X(45)]	Mandatory	1
-	Establishment—organisation identifier (Australian), NNX[X]NNNNN	Mandatory	1
	DSS specific information: Establishment sector component of organisation identifier to be reported as: 1. Public (excluding psychiatric hospitals) 2. Private (excluding free-standing day hospital facilities) 3. Public psychiatric 4. Private free-standing day hospital facility		
-	Full-time equivalent staffing data element cluster	Mandatory	1
	DSS specific information: This metadata item is collected at three levels: - State/Territory Health Authority reporting level. It is collected once for each State/Territory Health Authority. - Local Hospital Network (LHN) reporting level. It is collected once for each LHN. - Public Hospital Establishments (PHE) reporting level. It is collected once for each PHE.		
-	Establishment—full-time equivalent staff, average N[N(7),N]	Mandatory	10
-	Establishment—staffing categories, health code N[N]	Mandatory	10
-	Recurrent contracted care expenditure data element cluster	Mandatory	1
	DSS specific information: This metadata item is collected at three levels: - State/Territory Health Authority reporting level. It is collected once for each State/Territory Health Authority. - Local Hospital Network (LHN) reporting level. It is collected once for each LHN. - Public Hospital Establishments (PHE) reporting level. It is collected once for each PHE.		
-	Establishment—recurrent contracted care expenditure, National Health Reform Agreement 2011 product streams code N[N]	Mandatory	17
-	Establishment—recurrent contracted care expenditure, total Australian currency N[N(13)]	Mandatory	17
-	Recurrent non-salary expenditure data element cluster	Mandatory	1
	DSS specific information: This metadata item is collected at three levels: - State/Territory Health Authority reporting level. It is collected once for each State/Territory Health Authority. - Local Hospital Network (LHN) reporting level. It is collected once for each LHN. - Public Hospital Establishments (PHE) reporting level. It is collected once for each PHE.		

Seq No.	Metadata item	Obligation	Max occurs
-	Establishment—data estimated indicator, yes/no code N	Mandatory	16
	DSS specific information:		
	This data element is used to indicate where financial data have been estimated rather than directly sourced from the general ledger, audited accounts or other financial systems.		
	The PHE NMDS Working Group strongly supported the inclusion of a data element to indicate where data had been estimated or apportioned, as a way of informing data users of situations where the data do not reflect the actual items in the general ledger.		
-	Establishment—recurrent non-salary expenditure categories, code N[N]	Mandatory	16
-	Establishment—recurrent non-salary expenditure, total Australian currency N[N(13)]	Mandatory	16
-	Recurrent salaries and wages expenditure data element cluster	Mandatory	1
	DSS specific information:		
	This metadata item is collected at three levels:		
	- State/Territory Health Authority reporting level. It is collected once for each State/Territory Health Authority.		
	- Local Hospital Network (LHN) reporting level. It is collected once for each LHN.		
	- Public Hospital Establishments (PHE) reporting level. It is collected once for each PHE.		
-	Establishment—data estimated indicator, yes/no code N	Mandatory	10
	DSS specific information:		
	This data element is used to indicate where financial data have been estimated rather than directly sourced from the general ledger, audited accounts or other financial systems.		
	The PHE NMDS Working Group strongly supported the inclusion of a data element to indicate where data had been estimated or apportioned, as a way of informing data users of situations where the data do not reflect the actual items in the general ledger.		
-	Establishment—recurrent salaries and wages expenditure, total Australian currency N[N(13)]	Mandatory	10
-	Establishment—staffing categories, health code N[N]	Mandatory	10
-	Revenue data element cluster	Mandatory	1
	DSS specific information:		
	This metadata item is collected at three levels:		
	- State/Territory Health Authority reporting level. It is collected once for each State/Territory Health Authority.		
	- Local Hospital Network (LHN) reporting level. It is collected once for each LHN.		
	- Public Hospital Establishments (PHE) reporting level. It is collected once for each PHE.		

Seq No.	Metadata item	Obligation	Max occurs
-	Establishment—data estimated indicator, yes/no code N	Mandatory	11
	DSS specific information:		
	This data element is used to indicate where financial data have been estimated rather than directly sourced from the general ledger, audited accounts or other financial systems.		
	The Public Hospital Establishments National Minimum Data Set Working Group strongly supported the inclusion of a data element to indicate where data had been estimated or apportioned, as a way of informing data users of situations where the data do not reflect the actual items in the general ledger.		
-	Establishment—public hospital recurrent expenditure related revenue, revenue streams code N[N]	Mandatory	11
-	Establishment—public hospital recurrent expenditure related revenue, total Australian currency N[N(13)]	Mandatory	11
-	Total recurrent expenditure on National Health Reform Agreement product streams data element cluster	Mandatory	1
	DSS specific information:		
	This metadata item is collected at three levels:		
	- State/Territory Health Authority reporting level. It is collected once for each State/Territory Health Authority.		
	- Local Hospital Network (LHN) reporting level. It is collected once for each LHN.		
	- Public Hospital Establishments (PHE) reporting level. It is collected once for each PHE.		
-	Establishment—total recurrent expenditure, National Health Reform Agreement 2011 product streams code N[N]	Mandatory	17
-	Establishment—total recurrent expenditure, total Australian currency N[N(13)]	Mandatory	17
	DSS specific information:		
	Expenditure reported against this is estimated by jurisdictions. The costing methodology used in preparation of data for the National Hospital Costing Data Collection should also be applied in the generation for data for this item.		
-	Address—statistical area, level 2 (SA2) code (ASGS Edition 3) N(9)	Conditional	1
	Conditional obligation:		
	This metadata item is only required for the Public Hospital Establishments (PHE) reporting level. It is collected once for each PHE.		
-	Available bed—admitted contracted care, average number of beds N[N(7).N]	Mandatory	1
	DSS specific information:		
	This metadata item is collected at three levels:		
	- State/Territory Health Authority reporting level. It is collected once for each State/Territory Health Authority.		
	- Local Hospital Network (LHN) reporting level. It is collected once for each LHN.		
	- Public Hospital Establishments (PHE) reporting level. It is collected once for each PHE.
