	Value	Meaning
Permissible values:	1	Low birth weight (less than 2,500 grams)
	2	Normal birth weight (2,500 grams to less than 4,500 grams)
	3	High birth weight (4,500 grams and over)
Supplementary values:	8	Unknown birth weight

Source and reference attributes

Submitting organisation: Australian Institute of Health and Welfare (AIHW)

Data element attributes

Collection and usage attributes

Guide for use: For [live births](#), [birthweight](#) should preferably be measured within the first hour of life before significant postnatal weight loss has occurred.

In perinatal collections the birthweight is to be provided for live born and stillborn babies.

Source and reference attributes

Submitting organisation: Australian Institute of Health and Welfare (AIHW)

Relational attributes

Related metadata references: Supersedes [Product of birth—birthweight, code N Health](#), Standard 12/12/2018
[Indigenous](#), Superseded 14/07/2021

Implementation in Data Set Specifications: [Indigenous-specific primary health care NBEDS December 2020](#)
[Indigenous](#), Standard 14/07/2021

Implementation start date: 01/07/2020

Implementation end date: 31/12/2020

Conditional obligation:

Reporting against this data element is conditional on a 'CODE 1 Yes' response to '[Person—birthweight recorded indicator, yes/no code N](#)', and a 'CODE 1 Singleton' response to '[Pregnancy—birth plurality, code N](#).'

Data are only provided to the AIHW for babies born during the preceding 12 months up to the census date.

Data are provided to the AIHW for [live births](#) that are at least 20 weeks' gestation or at least 400 grams birthweight.

Data are not provided to the AIHW for babies without a medical record of their own at the health organisation, even if their information is recorded in their mother's record.

Data are not provided to the AIHW for babies with unknown gestational age.

DSS specific information:

In the ISPHC NBEDS, babies do not need to fulfil all the requirements of being an [Indigenous regular client](#), as long as they have a file at the health organisation.

The birthweight may have been recorded during an appointment or received from sharing client data with other organisations, such as a hospital.

In the ISPHC NBEDS only aggregated data with CODE 1, CODE 2, or CODE 3 are provided to the AIHW.
