Collection and usage attributes

Guide for use:

The value of the Emergency service stay—episode end status, code N should guide the selection of the value to be recorded as the end date of a non-admitted patient emergency service episode as follows:

- If the patient is subsequently admitted to this hospital (including those who are admitted and subsequently die before leaving the emergency service), then record the date the patient's emergency service clinical care is completed.
- If the service episode is completed without the patient being admitted, then record the date the patient's emergency service clinical care is completed.
- If the service episode is completed and the patient is referred to another hospital for admission, then record the date the patient's emergency service clinical care is completed.
- If the patient did not wait, then record the date the patient leaves the emergency service or was first noticed as having left.
- If the patient left at their own risk, then record the date the patient leaves the emergency service or was first noticed as having left.
- If the patient died in the emergency service as a non-admitted patient, then record the date the patient was certified dead.
- If the patient was dead on arrival, then record the date the patient was certified dead.
- If the patient was registered, advised of another health-care service, and left the emergency service without being attended by a health-care professional, then record the date the patient leaves the emergency service.
