# Injury event—activity type, code (ICD-10-AM 12th edn) ANN{.N[N]}

## Identifying and definitional attributes

<b>Metadata item type:</b>	Data Element
<b>Short name:</b>	Activity when injured
<b>METEOR identifier:</b>	746663
<b>Registration status:</b>	<a href="#">HealthI</a> , Standard 20/10/2021
<b>Definition:</b>	The type of activity being undertaken by the person when injured, poisoned, or other adverse effect, as represented by a code.
<b>Data Element Concept:</b>	<a href="#">Injury event—activity type</a>
<b>Value Domain:</b>	<a href="#">Activity type code (ICD-10-AM 12th edn) ANN{.N[N]}</a>

## Value domain attributes

## Representational attributes

<b>Classification scheme:</b>	<a href="#">International Statistical Classification of Diseases and Related Health Problems, Tenth Revision, Australian Modification 12th edition</a>
<b>Representation class:</b>	Code
<b>Data type:</b>	String
<b>Format:</b>	ANN{.N[N]}
<b>Maximum character length:</b>	6

## Data element attributes

## Collection and usage attributes

<b>Guide for use:</b>	External cause codes V00 to Y34 must be accompanied by an activity code U50-U73.  As per classification instructions, when multiple activity codes apply to a single injury event the code appearing highest in the ICD-10-AM Tabular List is used.  For example, an injury sustained during sport that is undertaken during school or as part of paid work should be assigned the activity code for sport (U50–U71).
<b>Comments:</b>	Enables categorisation of injury, poisoning, and other adverse effect, according to factors important for injury control. Necessary for defining and monitoring injury control targets, injury costing and identifying cases for in-depth research. This term is the basis for identifying work-related and sport-related injuries.
