Injury event—activity type, code (ICD-10-AM 12th edn) ANN{.N[N]}

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Activity when injured
METEOR identifier:	746663
Registration status:	Health! , Standard 20/10/2021
Definition:	The type of activity being undertaken by the person when injured, poisoned, or other adverse effect, as represented by a code.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Injury event—activity type
METEOR identifier:	750486
Registration status:	Health! , Standard 20/10/2021
Definition:	The type of activity being undertaken by the person when injured, poisoned, or other adverse effect.
Context:	Injury surveillance
Object class:	Injury event
Property:	Activity type

Value domain attributes

Identifying and definitional attributes

Value domain:	Activity type code (ICD-10-AM 12th edn) ANN{.N[N]}
METEOR identifier:	746685
Registration status:	Health! , Standard 20/10/2021
Definition:	The ICD-10-AM (12th edition) code set representing the type of activity being undertaken when injured, poisoned, or other adverse effect.

Representational attributes

Classification scheme:	International Statistical Classification of Diseases and Related Health Problems, Tenth Revision, Australian Modification 12th edition
Representation class:	Code
Data type:	String
Format:	ANN{.N[N]}
Maximum character length:	6

Data element attributes

Collection and usage attributes

Guide for use: External cause codes V00 to Y34 must be accompanied by an activity code U50-U73.

As per classification instructions, when multiple activity codes apply to a single injury event the code appearing highest in the ICD-10-AM Tabular List is used.

For example, an injury sustained during sport that is undertaken during school or as part of paid work should be assigned the activity code for sport (U50–U71).

Comments: Enables categorisation of injury, poisoning, and other adverse effect, according to factors important for injury control. Necessary for defining and monitoring injury control targets, injury costing and identifying cases for in-depth research. This term is the basis for identifying work-related and sport-related injuries.
